Yes, I have made it clear LDEQ needs to be on-board, but we need to discuss LDHH's role. The first time we contacted them, they requested we play the lead and they would review sample results. I think at this point they are more engaged and may be more willing to work directly with the RP &/or community.

Bryant/Nick:

I know you have checked with LDEQ on the sampling plan but I would reiterate to PPM that they must get approval from LDEQ/LDHH on the various sampling items so that this cleanup is done in accordance with LDEQ requirements to meet their standards and that LDHH can say whether there is a risk or not. LDEQ does it a little differently than we do.

Thanks

Gary Moore

Nic/ Madison – Attached is PPM's latest update. You can discuss with LDHH and we can forward for their review.
Please take a look and let me know what you think.
